ONRESCO

(ENGLISH NAME, DURESCO,)

Washable Water Paint

—FOR—

Wall AND Ceiling Decoration.

DAMP PROOF.

POSSESSES enormous covering power or body. Much more durable than Oil Paint. Unsurpassed for interior decoration, either for plain work or artistic treatment. Dries with a perfect flat, uniform surface, entirely non-absorbent. **Much Cheaper** than Wall Papers, Plastico or Oil Paint. Renewals do not cost more than ordinary Distemper. Destroys Fever Germs and prevents Vermin.

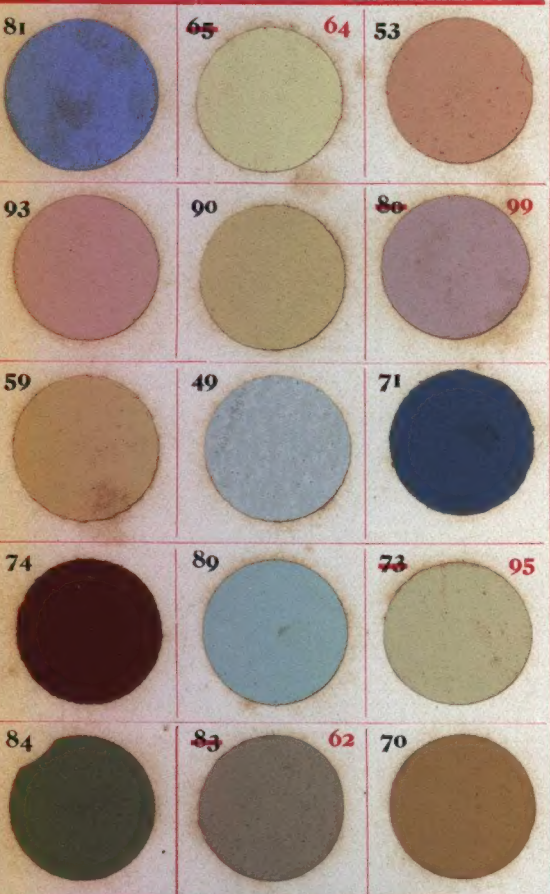
2 Gallons of Liquid to 100 lbs. of Onresco. If too thick thin with water.

TDCAT 1900 #PAPV03B739

ONRESCO in White and the following shades in stock.

By mixing two or more colors, many shades can be made.



ONRESCO—What is it?

A waterpaint with powerful body, drying perfectly flat. Totally unlike common distemper in appearance, it is equally simple to use. Cheap and effective for the plainest work. It is capable of the highest artistic treatment. It stands forth prominent as a wall covering for plain treatment, or as a ground for the most expensive decoration. It is infinitely superior to the most carefully finished oil paint flatted. Nothing in the shape of a paint produces the exquisite bloom and softness peculiar to ONRESCO. Thoroughly washable and anti-damp, whilst time renders it more and more permanent and indestructible.

ONRESCO—Its Uses.

This now well-known and improved material can be used for almost any purpose to which paint is put. For all cemented, plastered brick or stone surfaces, it is particularly suited; but it can also be used with splendid effect on wood or even ironwork. It is the only paint that can be with absolute safety applied on plaster three days old, or upon damp walls that defy the ordinary oil paint treatment. Inside for kitchens, passages, corridors, dining, drawing and bedrooms. Outside for all kinds of surfaces, cement, brick or stone. It may justly be termed **the only Sanitary Paint** for Hospitals, Asylums and Workhouses. For Government, Municipal and other public buildings it stands in the front rank for excellence.

DIRECTIONS.

One pound or one pint of Petrifying Liquid to ten lbs. of Onresco.

ONRESCO must not be made thin, or washed before drying at least 30 days.

Stop all cracks, etc., with Plaster mixed with ONRESCO. Sponge off all spots, etc. Then apply ONRESCO thinned with Petrifying Liquid. Touch up after first coat with same mixture all shady spots or patches that may dry out light or dark. Old painted Plaster Walls can pe treated in the same way. Should work finished in ONRESCO be afterwards painted or varnished, one coat of oil paint will bear out on it.

It is of the utmost importance that spotted, patched or shady places which dry out light or dark after the first coat should be touched up with ONRESCO before second coat is put on.

Then second coat a little thicker than first coat. Pounce or stipple last coat, as it makes much better work.

All old Distemper must be washed off before applying ONRESCO.

One coat of ONRESCO on new Plaster Walls stops all suction for Painting, and saves two coats of paint.

No sizing need be used to Varnish or Paint work finished in ONRESCO, as two coats of ONRESCO and one coat of Paint makes a better job than four coats of paint.

ONRESCO positively kills Damp, Smoke or or Water Stains.

ONRESCO—Our Guarantee.

Providing that Architects, Engineers and others specifying ONRESCO, appoint capable and respectable persons to execute work in ONRESCO, we are prepared to guarantee successful results, and if due information of work in contemplation is given, we will provide experienced men to start or superintend it. We give this guarantee as an earest to Architects and others, that our statements (borne out by practical experience) are thoroughly trustworthy.

ONRESCO—Where Used.

(IN EUROPE.)

It is no exaggerated statement to say that the material is used everywhere. We select, however, under different heads, a few of the prominent and recent works in ONRESCO; all these are open to personal inspection.

Prerbyterian Church, Belfast.

ONRESCO

HAS NO EQUAL

—FOR—

Painters and Decorators,

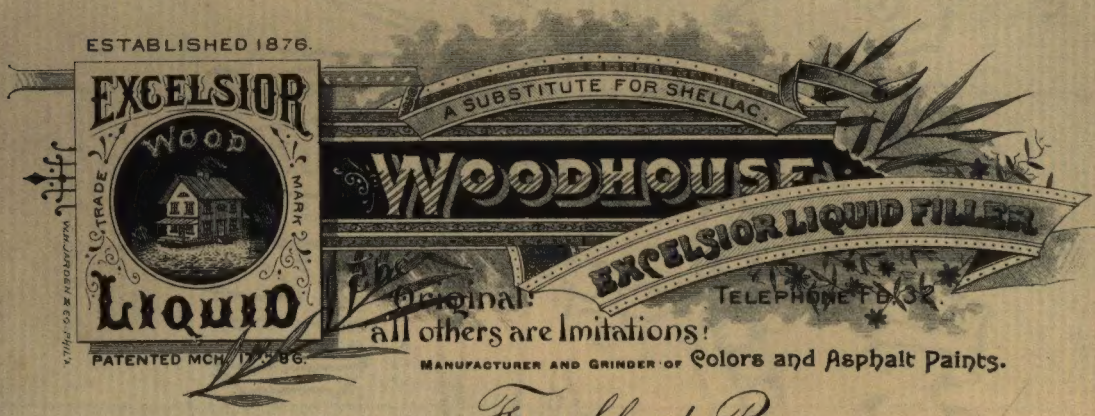
—IN—

Tinting Cornices, Centre Pieces, &c.

It is the same shade in the can as when dry on the work, thus saving much time in mixing. It is always ready for use.

To Paper on Damp Walls, use ONRESCO (half Onresco and half Petrifying Liquid) then give two coats and let dry about 12 hours; then paper.

PARTIES, THE STANDING OF WHOM WE KNOW NOTHING, WHEN SENDING US ORDERS, SHOULD SEND WITH ORDER, EITHER SATISFACTORY PHILADELPHIA REFERENCE, CASH, POST OFFICE ORDER OR DRAFT ON PHILADELPHIA OR NEW YORK.



Frankford, Pa. _____

Messs. Fourchy & Fourchy,

NewOrleans, La.

Gentlemen:-

Enclosed you will find Sample Colors of Onresco, (English name Duresco) a washable water paint, not affected by dampness, as you will see by wetting the enclosed colors.

It is used for plain as well as the most elaborate and artistic decorations in Public and Private Dwellings where paint, fresco or paper is used. There are thousands of Buildings in Europe done with Onresco, (Duresco) including Buckingham Palace, British Museum and many others, such as Hospitals, Churches, Hotels, etc.

It has the rich glow of water colors without the great fault of spotting with water or dampness, by reading the enclosed circular you will become better acquainted with Onresco.

Further information will be cheerfully given.

Yours respectfully,

Saml. F. Woodhouse
